What is covered in this class?

NEC electrical retraining:

Three hours of continuing education applicable towards DPOR license renewal.

Overview of electrical testing devices:

A review and demonstration of the latest testing equipment available. Testing procedures and good practices will be discussed and demonstrated.

Overview of MSHA electrical citations:

A review and discussion of the electrical violations most often cited by MSHA in Virginia and elsewhere. Accidents and fatalities will be highlighted as well.

Overview of Virginia law and regulations:

A review and discussion of the laws and regulations covering electricians and their work. There is also a presentation dealing with the laws and regulations specifically affecting electrical contractors.

What are the benefits from attending this class?

As previously mentioned, three hours of continuing education will be provided that is accepted by DPOR for license renewal.

Attending this class will satisfy the renewal requirements for the DMM electrical repairman certification.

This class will provide approximately six hours of annual refresher training as required by DMM and MSHA Part 46.

Where and when is the class held?

DMM presents this class each October at its office in Charlottesville, Virginia. For 2018, the class will be held on October 17th and will run from 8:00 AM until approximately 3:30 PM.

What is the cost for the class?

The class is provided free of charge to electricians employed by mining companies and contractors operating in Virginia.

How do I sign up for this class?

Simply contact the DMM Charlottesville office by calling 434-951-6310 or e-mail, vernon.harris@dmme.virginia.gov.
